1. Summary
2. CEO - Vehicle Management & Maintenance Survey
Aggregate Totals 1/30/97
3. Official Plated Vehicles by Agency 1/11/97

Summary

Missouri state government, like other governmental organizations and businesses, is working hard to improve its effectiveness and efficiency. Through the Council on Efficient Operations (CEO), the State of Missouri has embarked on numerous projects that reduce costs and improve effectiveness. One such project is the vehicle management and maintenance.

A team of state employees and private sector experts has been assembled to review the structure and operations of the state's vehicle fleets. The team has committed itself to improving operations, optimizing current investment, and reducing costs. In order to meet these goals, the team's first task has been to establish baseline measures for the many fleets that state government operates. This report serves to disseminate this information.

Information collection and analysis were conducted by the CEO's Vehicle Management and Maintenance Team. Collection and analysis were conducted through two different methods. First, departments were surveyed about their fleet. Second, departmental figures were checked with records provided by the Missouri Department of Revenue. Data sets from each are included.

CEO Vehicle Management & Maintenance Survey

As the team met, it realized that information regarding each agency's fleet should be examined. Since there exists no standard report mechanism, nor any agency that reviews all state owned vehicles, the team surveyed individual agencies.

The survey was structured as a simple matrix per type of vehicle. Types included:

- | | |
|----------------------------|-------------------------------|
| ▪ sub-compact | ▪ cargo van |
| ▪ compact | ▪ pickup <4500 GVW |
| ▪ mid-sized | ▪ light truck - 2WD <8600 GVW |
| ▪ full-sized | ▪ light truck - 4WD <8600 GVW |
| ▪ full-sized passenger van | ▪ carryalls |
| ▪ mini van | ▪ sport utility |

For each vehicle type, agencies answered questions regarding the number owned, purchase price, mileage, age, use, and repair costs. Departments also indicated their use of preventative maintenance programs, tracking systems, and vehicle replacement schedules.

Survey results suggest that state government directly operates some 6,527 vehicles, excluding heavy equipment. Results indicate a concentration of vehicles in certain areas. Likewise, results suggest that vehicle age and mileage directly relate to vehicle repair costs. These survey statistics will be used to formulate further measurements.

The Vehicle Management and Maintenance Team believes the survey was comprehensive. However, the team also notes that survey results were inconclusive, since several departments could not answer several questions or had difficulty responding. The team believes that slow data collection process and its difficulties show a need for improved tracking mechanisms.

Official Plated Vehicles by Agency

Originally, the team estimated the number of state vehicles to be above 10,000. However, survey results indicated roughly 7,000. The disagreement prompted the vehicle team to examine vehicle records from the Missouri Department of Revenue (DOR).

Revenue records indicate that nearly 13,000 vehicles are operated by the state. Discrepancies between DOR records and survey results exist because 1) several departments were not surveyed, and 2) colleges, universities, and school districts were not included in the survey. The Department of Revenue did note that many departments do not report vehicle changes.

These results and statistics are the foundation of the CEO Vehicle Management and Maintenance Team's work. Over the coming months, the team will examine state government's vehicle fleets and propose a variety of improvements. Ultimately, the team's work will help the CEO reach its goals of rightsizing state government, providing value for taxpayers, and cutting red tape.

CEO - Vehicle Management & Maintenance Survey - Aggregate Totals 1/30/97

The attached survey results are compiled statistics from each State of Missouri executive department. Please note that many fields are blank or not calculated. These blank fields indicate that several departments had inconclusive data for that question. Thus, an aggregated figure could not be calculated.

Data is displayed in the survey form. Vehicle types are displayed in the following sequence:

- | | |
|-----------------------------|---------------------------------|
| 1. sub-compact | 7. cargo van |
| 2. compact | 8. pickup <4500 GVW |
| 3. mid-sized | 9. light truck - 2WD <8600 GVW |
| 4. full-sized | 10. light truck - 4WD <8600 GVW |
| 5. full-sized passenger van | 11. carryalls |
| 6. mini van | 12. sport utility |

Please contact the CEO if specific departmental survey responses are needed.
